

BRAINSTORMING – IDEA GENERATION & PRIORITIZATION

Software Installation Request Automation in ServiceNow

Problem / Opportunity

Employees currently request software installations through emails or manual communication. This creates delays, limited visibility, unclear ownership, and potential compliance issues.

IDEA / SOLUTION	VALUE / BENEFIT	PRIORITY
Create a centralized digital wallet to store certificates, projects, internships, and achievements.	Students can manage all their credentials in one secure platform.	High
Implement skill verification by faculty or authorized organizations.	Ensures authenticity of certificates and increases recruiter trust.	High
Generate a shareable profile and QR code for recruiters to access verified skills instantly.	Makes profile sharing easy during placements and interviews.	High
Recommend learning resources and certifications based on students' current skill set.	Helps students improve skills and increase employability.	Medium
Provide dashboards showing skill progress, completed certifications, and placement readiness	Enables students to track growth and prepare for career opportunities.	Medium
